Art Unit: 2652

Claims 1-24 are pending.

Election/Restriction

1. Applicant's election without traverse of Invention I, i.e., claims 1-17, in Paper No. 6 is acknowledged. Claims 18-24 have been withdrawn from further consideration due to this election.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (a) Claim 1, line 7, the language, "in the height direction" is vague, since it is not readily apparent whether this direction is the same or different than the direction from the front end face, i.e., opposing face, to the rear of the head, i.e., opposite to the opposing face.

Clarification is necessary because thickness of layers is conventionally correlated to the "height" direction; (b) claims 6, 7 & 8, the language "the two sides"(claim 6) "the two side faces" (claims 7 & 8) lacks proper antecedent basis; (c) claim 6, the language "straight or curved" is misdescriptive, as it is not readily apparent what other shape it could be; (d) furthermore, with respect to "the two sides of the front end face in the track width direction are tilted" is vague. It is not readily apparent with respect to what surface the sides are tilted. Also, "the front end face" of what, i.e., the main pole layer or auxiliary pole layer, etc.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-2, 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Sato et al (US 2002/0006013). (as per claim 1) Sato et al discloses a perpendicular magnetic recording head, as shown in FIG. 1; including: an auxiliary pole layer 2; a main pole layer 8; a coil layer 4; a front end of the auxiliary pole layer and the main pole layer are exposed at an opposing face of the head opposing a recording medium 17; the front faces being separated by a gap therebetween; the coil layer being located inward from the opposing face; wherein the head further includes a nonmagnetic layer 10 formed on the main pole layer and a connection layer 6 extending from the auxiliary pole layer and magnetically connecting with the main pole layer 8 (via yoke layer 9); the connection layer being located inward from the opposing face which is surrounded by the coil layer; (as per claim 2) wherein the yoke layer magnetically connects the main pole layer to the connection layer; (as per claim 11) wherein the saturation magnetic flux density of the main pole layer is higher than the saturation magnetic flux of the yoke layer (inherent to the described structure).

6. The applied reference has a common Assignee and Inventor(s) with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a

Art Unit: 2652

showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

7. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Allowable Subject Matter

8. Claims 3-10, 12-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
